NEXT MEETING

WHEN: Friday, June 10, 1983

TIME: 7:30 P.M.

WHERE: Heartland Chapter
American Red Cross
38th and Dewey Avenue
Omaha, NE 68105

PROGRAM: Al McMillan---"Antennas"

NOTICE

If you lost a 2-meter rig in the past two years, we may have it. To claim this rig, send a letter to Ak-Sar-Ben ARC, P.O. Box 291, Omaha, NE 68101 describing the manufacturer, model number and any distinguishing features.

PREZ SEZ

If you missed the Auction, you missed a good one. The Auction was very successful, and there was a lot of good gear out there to choose from. Jim NØAIH and Mitch NØAZF did a great job in organizing the event. The only problem I saw was when I was helping on the Auction block, and I almost gave away KØBOY's scanner — but we rescued it, and I'm sure Doug is putting it to good use.

Chuck Peaker had a good crew in the kitchen, and the food was good. I made enough trips for a family of four all by myself. If you noticed the Treasurer's desk, Dick KAØAAB was doing what he likes best — taking in money.

Thanks to all the folks who helped out. You are many in numbers, and your support was appreciated by Jim, Mitch, and the rest of us. A special thanks to Tom KØPQR for his usual fine work.

Dave Hamilton NØCLW tells me that the tickets for the KFAB tour and Bellevue Queen dinner are moving along. Be sure to set aside time to give Dave or Sandy a call and get your tickets.

Al McMillan will be joining us at our June meeting to give us a well based, experienced program on Antennas. Be sure to be there and catch this timely presentation.

Until then, 73's.

de Bill NØANQ

Ed Note: KFAB tour, Dinner, July 29, no regular meeting in July.

GENERAL MEMBERSHIP MEETING American Red Cross Building 39th & Dewey, Omaha, Nebraska May 13, 1983

Acting President Ray Fink WDØGIL called the meeting to order at 19:30 hours and led those in attendance in the Pledge of Allegiance.

Dick KAØAAB gave the Treasurer's report. Moved and seconded to accept the Treasurer's report.

Education Chairman Chuck KCØDB reported classes for the Fall are being planned and thanked the instructors for their past year's service.

Frank KØSST reported things are ready for Field Day at Glenn Cunningham Lake. He does need shack chairman.

Duke WDØEWH reported on T-shirts. Price will be \$9.50 each. He was taking orders for the first shipment.

Jim NØAIH reported the 1983 Auction was a complete success.

Moved and seconded to adjourn meeting at 2000 hours.

A very interesting program about DX'ing was presented by several members of the Club.

Refreshments and Eyeballs were enjoyed by all after the program.

Respectfully submitted,

Ray Fink, WDØGIL, Secretary

Larsen Kūlrod Antennas

offer amateurs all the advantages enjoyed by the commercial two-way radio field.

The Larsen Kūlrod® Antenna was initially designed to be a superior antenna for the highly competitive commercial 2-way radio market. Today, Larsen antennas are in the forefront for both the commercial and amateur fields because they combine top performance with long range dependability.

The Kūlrod® Difference.

The Larsen Kūlrod® whip is made of 17-7 PH precision tapered stainless steel for durable flexibility, while minimizing radiation pattern distortion at higher vehicle speeds. It is quadruple-plated with a combination of nickel, copper and chrome for maximum power radiation efficiency. Two set screws keep Larsen antennas double-locked firmly in the base.

Magnetic Mount

Super-Efficient Air Wound Coils.

Larsen's loading coils are air wound for the most efficient transfer of communication energy. No power absorbing coil form is used. The base loading coil, when used, is made of extra heavy wire to stay in position and will not detune with years of use. Cutting the antenna rod, by following the instructions and cutting chart accompanying the antenna, assures lowest V.S.W.R.

Trunk Lid Mount

Gutter Clamp

Streamlined Appearance.

Larsen Kūlrod® Antennas are designed for eye appeal with a neat, low profile base that blends with today's vehicles. An occasional wipe with a soapy cloth will keep the entire antenna looking new and shiny. The special platings on mount hardware add to the appearance and keep corrosion build-up to a minimum.

Kūlrod® is a registered trademark of Larsen Electronics, Inc.

Mosley TA-33

The famous Mosley TA-33 three element beam provides outstanding 10, 15 & 20 meter performance. Exceptionally broadbanded to give excellent results over full Ham bandwidth. Exclusive Mosley Trap design offers resonant frequency stability under all weather conditions. Element center sections are of double thickness aluminum to reduce sag. Boom requires no bracing. Heavy duty universal mounting plate fits masts up to 1 1/2 inch O.D. All hardware is stainless steel. Antenna handles full kW amplitude modulated. You feed with one coax line (RG-8/U recommended). The TA-33 may be used on 30 and 40 meters. (See Conversion Kits, specifications and performance data.)

\$249.00... Includes Shipping!!

LETTER

25 May 1983

To the Editor:

During the Yom Ha'atzmaut (Independence Day) observance, I operated the amateur radio station at the JCC and was able to get a message to an Israeli amateur with the assistance of a "Ham" in Long Island, New York.

I could hear Amateur Radio Station 4X6VA in Israel, but he could not hear my signal because of heavy static. Jim Duggan in Bayshore, Long Island, New York, station WA2LEW, joined in and said he could get the message to the station in Israel.

He "relayed" the message: "Greetings from this amateur radio station in the Jewish Community Center, Omaha, Nebraska, where we are celebrating Israel's 35th birthday with a day-long gathering."

Sam Kaplan — WDØBVH

P.S. Our station at JCC is alive and well!
